

## How CHOMP! Works

CHOMP is the first cleaner ever brought to the consumer market that will actually eat oil. Based on technology used to clean up major oil spills, CHOMP contains billions of oil eating microbes, “Nature’s janitors”, whose natural enzymatic action make it a tremendous cleaner.

- 1) CHOMP is pH neutral – CHOMP is neither corrosive (acid) nor caustic (alkaline). This means CHOMP relies on a safe cleaning action instead of aggressive chemicals that can cause damage to whatever you’re trying to clean.
- 2) CHOMP contains no dyes – this, along with being pH neutral, makes CHOMP safe for just about any cleaning job – fabrics, woods, plastic, painted surfaces, nylon, rubber, all hard surfaces.
- 3) CHOMP actually eats oil – use it on a leak spot on your garage floor or driveway, cooking oils on your kitchen cabinets, counters and appliances – CHOMP leaves nothing but water and carbon dioxide. Safe for the environment, CHOMP is the only cleaner that doesn’t simply transfer problems downstream – CHOMP improves the environment by eating hydrocarbon contaminants.

The plant on the left was watered with Simple Green™ for one week. The plant on the right was watered with CHOMP! for the same time period.

## How To Use CHOMP!

General directions are simple – **Spray, Scrub, and Rinse.**

**General cleaning:** This is best done with a stiff brush – a nail-brush is ideal. CHOMP also works well with a sponge mop for floor cleaning or a scrubbing pad/sponge for bathroom tub, shower, and tile cleaning.

**Laundry applications:** Spot treat and wash or, for oil-soaked clothes, spray thoroughly and let the garment soak overnight in a bucket of water.

**Carpets:** Spray the spill with CHOMP, blot with a clean, damp cloth and repeat if necessary. For use in steam vacs, substitute CHOMP for other liquid carpet cleaners, and follow the cleaning unit directions.

**Old oil stains in concrete (driveways and garage floors):** Several applications of CHOMP may be required to allow for its vertical cleaning ability to go down into the pores and “eat” the old stain. Just spray, scrub, and rinse – the longer you can leave the treated area wet, the more CHOMP will “eat”. Rinse CHOMP into your yard – it won’t harm your grass or plants.

## A PARTIAL LIST OF CHOMP! APPLICATIONS

### AROUND THE HOUSE

<b>Carpet</b>	<b>Spot clean</b> – spray, blot (fresh spills) or scrub (old stains) and blot clean with a damp cloth.  <b>Steam vacs</b> – add CHOMP! in place of manufacturers cleaner for safe, non-toxic cleaning and use per instructions.
<b>Clothing</b>	<b>Spot treat</b> – spray CHOMP! on stain, thoroughly soaking material and wash per normal instructions. For heavily oil-soaked clothes add 8-10 ounces of CHOMP! to warm water in a 5 gal. plastic bucket and let the clothes soak overnight. Wash the next day per normal instructions.
<b>Countertops</b>	Spray, scrub, and rinse. Always sanitize areas where food is prepared.
<b>Stovetops</b>	Same as for countertops, CHOMP! is especially effective for cleaning up cooking oils, bacon splatter and greases.
<b>Kitchen Cabinets</b>	CHOMP is an excellent choice for removal of cooking splatter and oily, greasy films that form on cabinet faces. Spray directly on cabinet surface and wipe with a damp sponge or cloth. Allowing

CHOMP to sit on the surface for awhile before scrubbing will help make your cleaning easier.

### **Floors**

Add several ounces of CHOMP! to warm water for effective mop and bucket cleaning. CHOMP! is safe for all floor types and is especially good for soft, ceramic tile floors as it will not damage the tile.

### **Fireplace**

CHOMP! is especially effective at cleaning soot from glass and any surfaces around the hearth – brick, stone, etc.

### **Painted Surfaces**

CHOMP! is safe for general cleaning of walls and ceilings. For stubborn marks (crayon, etc) try using a little CHOMP! concentrate on a washcloth, scrub and rinse with a clean, damp cloth.

### **Wood Decks**

CHOMP! is a very good cleaner of wood decks and is especially effective when used through a pressure washer (full strength or further diluted – consult your users guide). Best of all, CHOMP! will not harm any of your plants or landscaping around your deck.

### **Grills**

CHOMP! is an effective cleaner for most cleaning jobs. Baked, cooked-on grease will require a stiff brush (wire brush if applicable).

## **GARAGE**

**Floors/ Driveways** Use CHOMP! to clean those oil spots in your floor. With one application the surface will be hydrocarbon free. With repeated use old stains will gradually fade and disappear as CHOMP!'s vertical cleaning ability goes into the concrete's pores to "eat" those built-up oil stains. CHOMP! is also good for those leaks on your driveway and will work equally well on pavers, brick, and stone. Never use on fresh blacktop. Make sure new asphalt driveways have "cured" at least 6 months before using CHOMP!. For best results rinse after cleaning. CHOMP! is safe for your surrounding lawn and landscaping.

## **Before**

## **After**

**Lawn Equipment** CHOMP! is perfect for 'after chores' clean-up. Use on mowers, edgers, blowers – any of your power tools and equipment. Spray CHOMP! after use and rinse with a garden hose. CHOMP! is safe for all surfaces (bare metals may rust).

**Tools** Spray CHOMP! on oily, greasy tools after use and wipe dry.

## **AUTO**

**Interiors** CHOMP! is ideal for cleaning carpets and cloth upholstery – oil stains, spilled coffee, food stains (even cleaned up after a spilled blueberry pie in a brand new car!), sticky hand-prints – any kind of cleaning inside your vehicle. Remember, CHOMP! is safe for all surfaces – leather, nylon and vinyl - but you will want to further dilute CHOMP! for any glass or reflective surfaces.

**Exteriors** For brake dust on alloy wheels, spray CHOMP! and wipe clean with a wet sponge or cloth. Spray CHOMP! on fresh road-oil and tar splatter, use a non-abrasive mesh scrubbing sponge (the old style "bug sponge") to safely clean your car and truck. Pour a couple of ounces into a bucket and fill with a garden hose and sprayer for an excellent car wash that's safe for your surrounding yard.

## **RECREATION**

**Boats** CHOMP! is the ideal cleaner for all applications in your boat – carpet, seats, plastic, fiberglass, wood – any and all cleaning jobs in your boat. CHOMP! is especially good for cleaning up any fuel overfills around your boat's gas cap. Best of all, CHOMP! is safe for your boating environment.

**Golf Clubs** CHOMP! will quickly clean up those irons and woods – spray, scrub, and rinse.

**RV's** Your RV is your "house on wheels", therefore CHOMP! is the ideal cleaner – use as you would around your house and auto.
